

## NEW HORIZONS – PRODUCT INFORMATION SHEET

### SUUNTO – HEL 02 / D9TX / Transmitter

## Suunto Hel02

- Deeper, longer dives with support for multiple gases such as trimix, nitrox, and oxygen
- Simplified planning of dive profiles, gases, and back-up plans with the graphical Suunto multi-gas dive planner
- Continuous decompression through the Suunto Technical RGBM algorithm
- Rated to 120 m/393 ft and with full mixed-gas capability

## Suunto D9tx Titanium

- Trimix support (including helium and oxygen)
- Gas-switching between up to eight gases
- Full continuous decompression with Suunto Technical RGBM algorithm
- 3D tilt-compensated digital compass
- Three dive modes: Air, Mixed Gas, Gauge
- Optional wireless air integration
- Built-in dive planner
- Detailed graphical logs and dive data on your laptop using [Suunto DM4 with Movescount](#) software
- Available with titanium bracelet or black elastomer wrist strap

## Suunto Wireless tank pressure transmitter

- Compatible with [Suunto D9tx](#), [D6i](#), [D4i](#), [D9](#), [Hel02](#), [Vytec DS](#), and [Vyper Air](#) dive computers
- Monitor tank pressure data wirelessly from dive computer
- Monitor air consumption data wirelessly from dive computer
- Battery life is around 2 years (at 100 dives per year)
