

EXPOSURE SUITS INFO SHEET – DRYBASE

Drybase - Ultra-Fast Wicking Baselayer

Cotton holds perspiration and moisture next to the skin where it can feel clammy, cold and uncomfortable. Drybase is the high wicking underwear system for drysuit diving from Fourth Element. Using ultra fast wicking fabric, the Drybase garments are the ideal alternative to cotton underneath a thinsulate or other undersuit. The garments' exceptional wicking performance means that the skin is kept dry and the wearer is much more comfortable during and after the dive, and is able to get the most out for the performance of their undersuit.

Long Sleeved Top – Mens :

Designed with a looser fit, this top can be worn on the way to the dive and then worn as part of a layering system, next to the skin. Flat seams make the top very comfortable and the wicking fabric keeps the skin warmer and drier. Wear underneath your everyday clothes prior to the dive, and then there is no need to get changed completely, thus helping you to stay warmer beforehand.

Long Sleeved Top – Womens :

With pillar valve o-rings used in place of buttons, this top has a subtle diving theme, yet looks good and is a great next to skin layer beneath any undersuit. It can be worn on the way to the dive and then worn as part of a layering system, next to the skin. Flat seams make the top very comfortable and the wicking fabric keeps the skin warmer and drier. Wear underneath your everyday clothes prior to the dive, and then there is no need to get changed completely, thus helping you to stay warmer beforehand.

Leggings – Mens :

A high performance alternative to cotton underwear, these leggings provide enhanced thermal protection and keep the skin drier and more comfortable during the dive. A high waist, wide elasticated waistband and flat seams throughout maximise next to skin comfort.

Leggings – Womens :

A high performance alternative to cotton underwear, these leggings provide enhanced thermal protection and keep the skin drier and more comfortable during the dive. A high waist, wide elasticated waistband and flat seams throughout maximise next to skin comfort.
